(Professional course in Web Development)
2018 - 2019

PROFILE

Full-Stack Developer with 2+ years of commercial experience building scalable web applications, fintech systems, e-commerce platforms, and AI-powered automation tools for international clients.
Specialized in JavaScript/TypeScript, React, NestJS, and ASP.NET Core, with hands-on experience across full-cycle product development — from frontend architecture and backend services to database design, cloud deployment, CI/CD automation, and production support.
Focused on building high-performance, scalable, and business-oriented systems with clean architecture, secure API development, and responsive mobile-first user experiences. Passionate about creating optimized, fast-loading, and reliable applications with smooth UX across all devices and production environments.

WORK EXPERIENCE

Digital Agency Moun — SEP 2025 - MAY 2026
Full-Stack Engineer

- Developed scalable web applications for e-commerce, booking, fintech projects
- Built REST APIs, backend services, and JWT authentication systems using NestJS
- Developed admin dashboards for analytics, users, and operational workflows
- Optimized application architecture, improving overall performance by 42%
- Managed production deployments and CI/CD pipelines
- Delivered responsive React + JavaScript/TypeScript interfaces optimized for performance and UX

Fire-Group — Mar 2025 – Sep 2025
Full Stack Developer

- Built a scalable cryptocurrency website using React,TypeScript,NestJS, PostgreSQL
- Reduced page load time by 38% via rendering and API performance optimization
- Developed modular admin dashboard with role-based access control
- Developed a blog management system with full CRUD functionality
- Implemented secure JWT authentication and structured API communication
- Delivered responsive mobile-first UI optimized for cross-device performance

Freelance Full-Stack Developer — Sep 2023 - Feb 2025
(International Clients)

- Developed scalable full-stack web applications for small and mid-sized businesses
- Built e-commerce systems with secure authentication, cart functionality, order management, and admin dashboards
- Created responsive marketing websites with modern UI/UX tailored for client acquisition and brand presentation, increasing user interaction by 35%
- Designed REST APIs using NestJS and integrated third-party services
- Delivered SEO-optimized, mobile-first, high-performance web solutions
- Managed production deployments using Docker, VPS, Vercel, Render,CI/CD

SELECTED PROJECTS

- E-commerce Websites— user accounts, order tracking, admin dashboards
- AuctionHub — enterprise vehicle auction website with real-time bidding, JWT authentication, comments, moderation system, and admin dashboard
- Conversion-Focused Landing Pages — premium mobile-first responsive websites optimized for UX, branding, and lead generation
- Cryptocurrency Platform – user accounts, blog system (CRUD), admin dashboard
- NDA Projects (FinTech & E-commerce) – confidential full-stack platforms
- FinTech Systems – secure financial solutions for international clients
- Business Analytics Dashboards – data visualization & management systems
- AI Automation Module — integrated LLM (OpenAI API) to automate repetitive operational tasks and internal workflows using prompt engineering
